**Chinook Environmental Services Ltd. announces acceptance of conditional  
Purchase Offer by Integrated Energy Services Inc.**

Chinook Environmental Services Ltd. is pleased to announce its conditional acceptance of a Purchase Offer from Integrated Energy Services Incorporated.

The new plan of arrangement will see the business and assets transferred over to Integrated Energy Services Inc., but continue operation under the established name of Chinook Environmental Services Ltd, a division of Integrated Energy Services Inc.

Don Canard, Business Development lead, is enthusiastic about the new plan of arrangement. “Integrity” is a key base for our business platform for Integrated Energy Services Inc.”, notes Don, “and the addition of an Environmental Service Company already synonymous with integrity will only strengthen our integrated multi-service position within the upstream drilling market”.

Chinook’s operations and customer service will remain unchanged, with “business-as-usual”, however the business management team will be restructured to provide congruence and much more efficient top-end management.

Mitch Golay, director of Chinook Environmental Services Ltd., is very happy about the plan of arrangement. To add Chinook Environmental Services to Integrated’s respectable team is a “win-win” situation for his clients and the company’s overall strength.

As part of the arrangement, Mr. Golay will be removed from management, but still provide technical assistance on a as-required basis to allow for troubleshooting and a seamless cross-over. This will also allow Mitch to focus on some other personal and professional interests.

Any questions may be directed to Don Canard at [d.canard@chinook.com](mailto:d.canard@chinook.com).
